

Twinning Poland-Italy

FROM OUR SIGHT

We arrived at the end of
this incredible experience!
In this "journal" you'll
find our final thoughts.

It was a wonderful experience, I enjoyed seeing the differences and similarities of Polish girls, their activities, their songs and their typical dances. I found them very enterprising and ready to discover new things, friendly and social. I loved collaborating with them and I found every online meeting we did very useful, it was all a lot of fun! I hope that this experience can be repeated in the future to enrich our cultural baggage of knowledge around the world! It's nice to see how both we and they are committed to one goal, which is to create links and how our ideas are merged until we reach a common agreement.

- Solicitous Ermine

Vittoria & Totta

This twinning experience was a whole new thing for me and I had a great time. I had never started a twinning between patrols of other countries and I must say that it was absolutely interesting to discover and observe some things of Polish culture for example dances, songs and food. I also started to talk to a Polish girl, Kasia, to create the twinning logo and even if it was in another country it was as if we were working side by side. From this twinning I learned a little about the history of Poland that honestly, according to my point of view, was very interesting but above all fun, and I also learned how to cook pieroghi very well. I hope to repeat such an experience in the future!

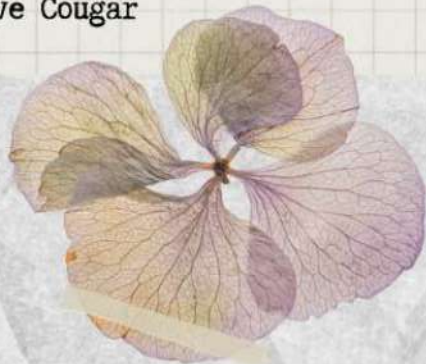

Carlotta Marianelli
- Genuine Dolphin

This is one of the experiences that I will carry in the heart together with every person known and every activity made. It helped me to know better my patrol, the talents of each girl and to know people that I wouldn't have the opportunity to know but above all I discovered many things about myself. I loved to learned something about a new cultures and share mine in particular so I appreciated the exchange of advice and jokes made with the weasels.

I think that each of us really enjoyed this experience and that even the smallest ones had a great time!

Martina Billeri
- Intuitive Cougar

Marti & Vivi

This experience has been fantastic, certainly not without difficulties but we know that "In the midst of difficulties opportunities arise". We discovered a new culture and understand that it was not so different from ours.

This exchange has enriched us and made us more aware of our culture. We laughed and danced together but we also reflected on how a promise bound us so much with unknown girls that we discovered similar to ourselves.

Concluding my journey in the guides with this experience was the greatest gift I could have.

Vittoria Biagetti
- Enterprising Wolf

This experience was very beautiful. I learned many things and got to know the Polish culture that fascinated me a lot. My favourite part was the Polish dance: very stylish and festive. Doing the group dance together with the department was beautiful. Everything was wonderful and I thank the Polish Patrol for the kindness and sympathy they showed to us!

In my opinion, it was a very beautiful and very instructive experience, both because it helped you make new friends different from the usual, and to improve the pronunciation. It has also been very useful to improve the friendships that we have in the patrol and to strengthen them by being more time together, collaborating, doing more meetings and doing fun activities. even if there was some difficulties we stayed very good together and we shared a lot of thoughts and memories.

Bianca Bulleri

I really enjoyed this experience because it gave me the opportunity to get to know non-Italian people and I also managed to communicate with them by learning new traditions and cultures. This experience has given me the opportunity to pass on the traditions and culture of my country and I hope to be able to repeat such an activity so as to grow mentally acquiring more knowledge of the world. Moreover I was able to understand the importance of knowing foreign languages because at school I was living it a bit like an obligation but now I understand that it is really useful.

Anna Sofia Varusio

We want to thank first of all the weasels who have always been available, curious and enterprising. We had a great time together and as we always said: we were destined!

We thank the guides of our departure for accepting the challenge to try out with us the discovery of a new culture and our leaders for supporting us in this challenge.

Thanks to the Patrol Europe of the National Patrol Guide for this international adventure!

Good hunting and good road!
